

The background is a deep blue gradient. In the upper center, there is a faint, stylized flower or starburst shape. The lower half of the image is filled with abstract digital patterns, including binary code (0s and 1s) and circuit-like lines, creating a sense of depth and technology.

PART 01

Project introduction

Build a CAEN ecosystem integrating token auction, proposal management, social networking, media information, cross chain and entertainment

1.1 PROJECT DESCRIPTION

CAEN

CAEN is a multi chain ecosystem, supporting the five chains of Tron, ETH, BSC, heco and okchain (which will continue to increase in the future). It is committed to building a multi ecological aggregation platform integrating social networking, token auction, community proposal governance, media information, cross chain and entertainment.

1.2 Introduction to ecology

Proposal governance

Decentralized community proposal governance platform function, users can participate in voting, help and other functions, and can help the proposal project drainage, expand influence.

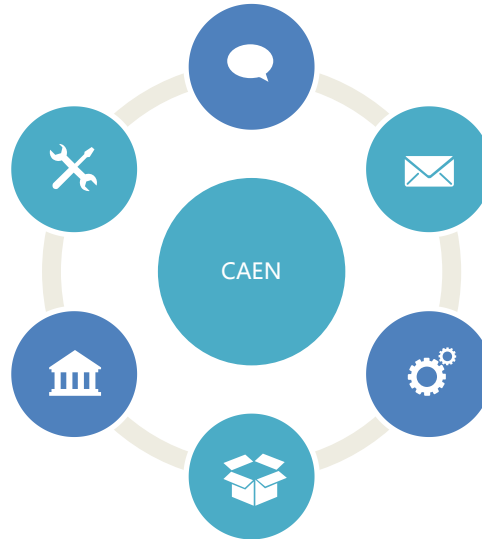

Cross chain tools

The standard currency is not a manual cross chain tool, and one key and multiple chains are transferred to each other.

social contact

User communication platform, free interaction, no data storage, let everyone have privacy space, and realize the red envelope function of standard currency.

Media information

Media aggregation platform for all aspects of information, with publishing, appreciation, comments and other functions

Token auction

Project token auction helps project growth.

entertainment

Create high quality game and entertainment platform

PART 02

Proposal governance platform

Link projects and users, let good projects be mined, increase the cohesion between users and the community, and help the growth of small and medium-sized projects.

2.1 MARKET POTENTIAL

Shallow links between DAPP and users

Many dapps only rely on social communities and user links, and their information is complex, so they can't effectively obtain the real useful information.

DAPP has poor exposure ability

DAPP's poor exposure ability leads to the death of many high-quality new projects before they start to develop.

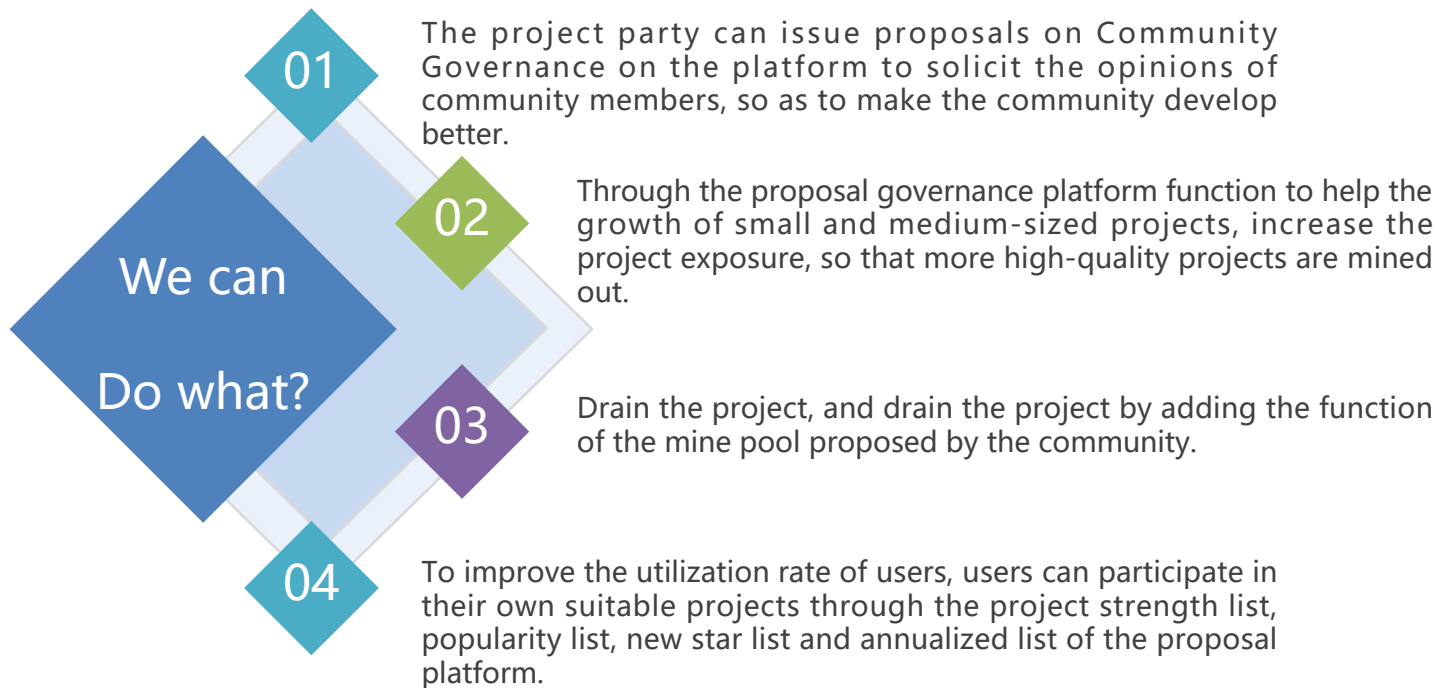

DAPP has no function of community governance

At present, many dapps in the market have not developed the functions of community governance, and the so-called community governance without foundation is just shouting slogans.

2.2 Proposal governance platform

PART 03

Social platform

More free places for communication

3.1 Project background

Difficult to use

Most domestic users use foreign communication software such as telegram and Twitter to communicate, but using this type of software needs a series of processing, such as climbing over the wall, which makes many users unable to communicate conveniently

No privacy

Domestic social software is strictly regulated and has no privacy.

Data set

For conventional social software, data are all retained in the social company, which is easy to cause problems such as user data leakage.

3.2 Social platform

Easy to use

Open DAPP to use without climbing over the wall

Data cleaning

For chat content, save up to 24 hours will be automatically cleaned up

Mutual transfer of assets

Support multi chain digital asset transfer, red envelope, one click transfer and other functions,

**What can
we solve?**

High privacy

The platform does not need any authentication, and can participate in chat and communication with wallet.

Multi link interworking

Our DAPP is multi chain, and users of the supported chain can socialize.

Community concentration

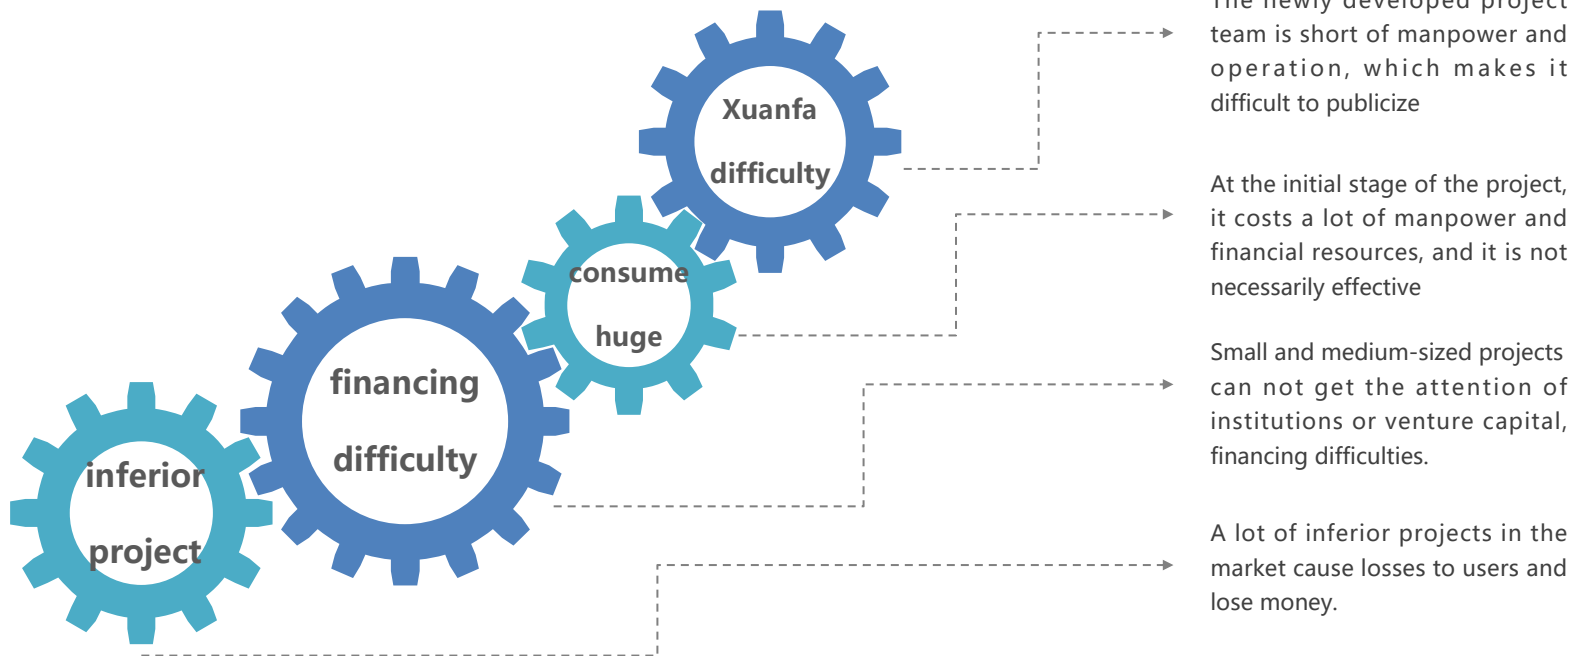

Support the formation of communities and other functions to help the growth of the project

PART 04

Token auction platform

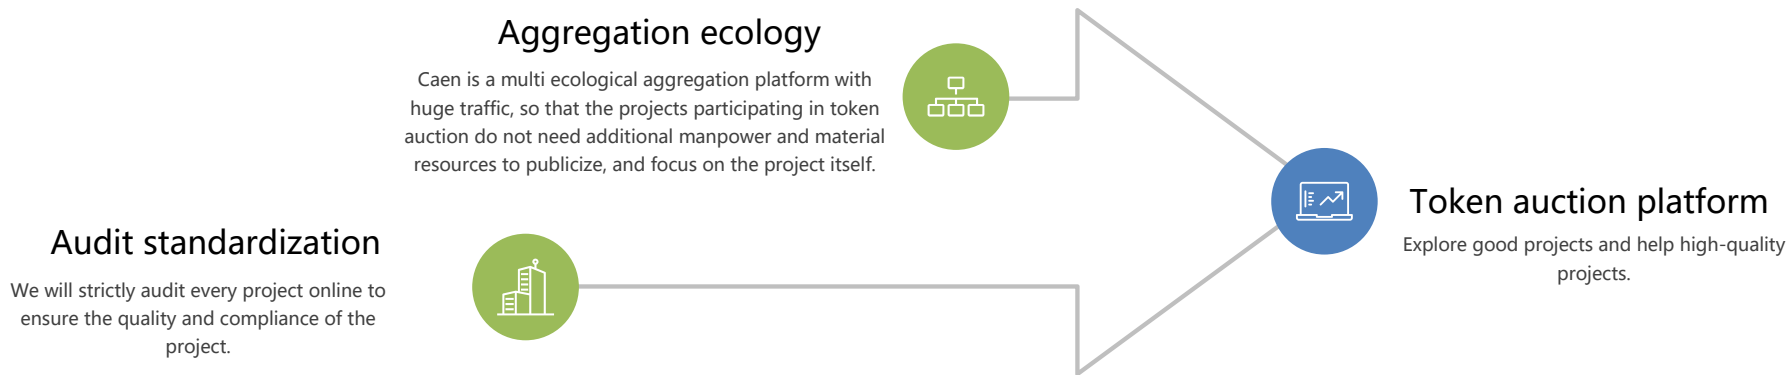

Build a token auction platform to help each project hatch smoothly and build a complete and free token auction ecosystem.

4.1 market analysis

4.2 Token auction platform

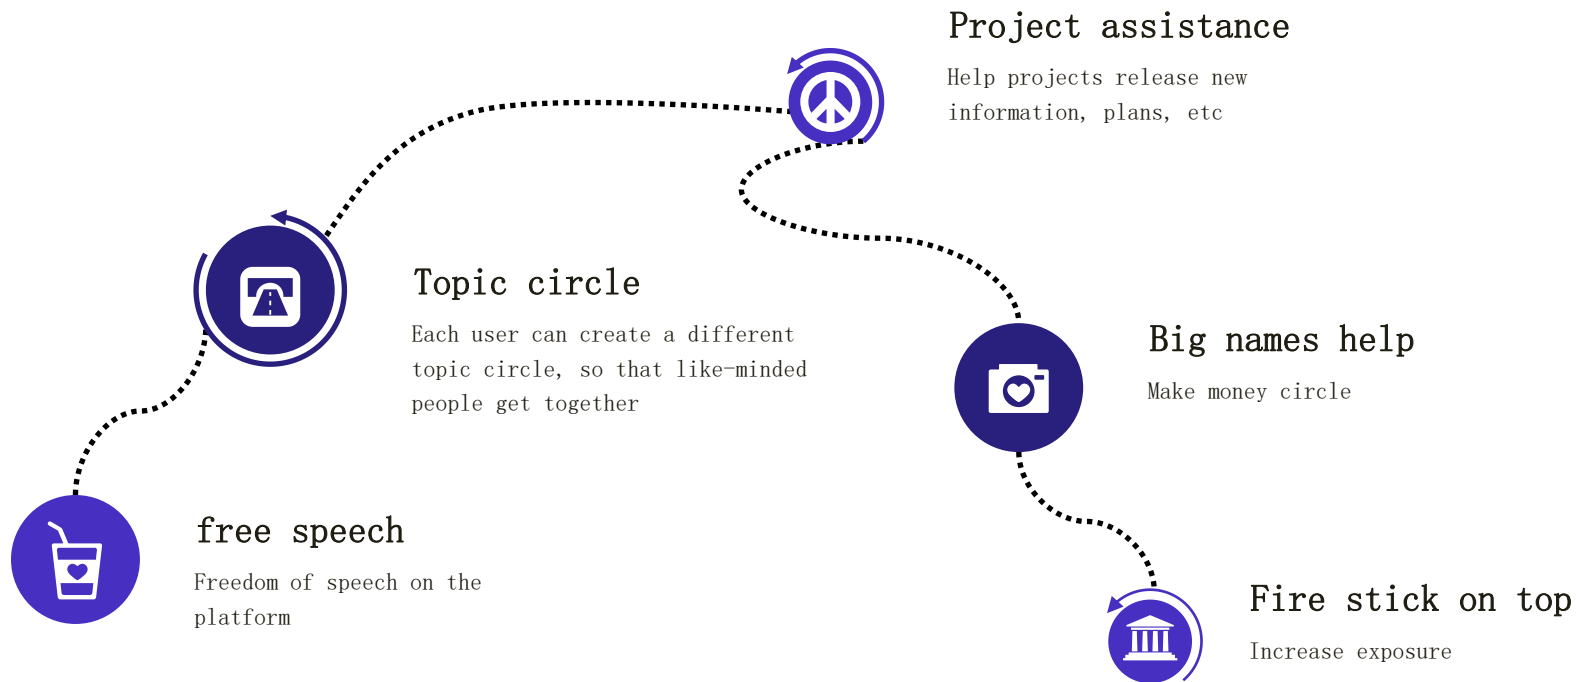

PART 05

Media information platform

Media links you and me

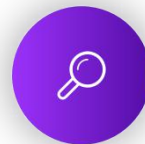

5.1 Post Bar Plaza

5.2 Media information

First hand information

Interpretation and analysis of the
market of bigwigs

Project column

Latest events

PART 06

Cross chain tools

One click cross chain tool

6.1 About cross chain tools

One key to each other, easier

02

01

Multi Chain interworking, more convenient

Standard currency across the chain, faster

04

03

No manual operation, safer

PART 07

Entertainment platform

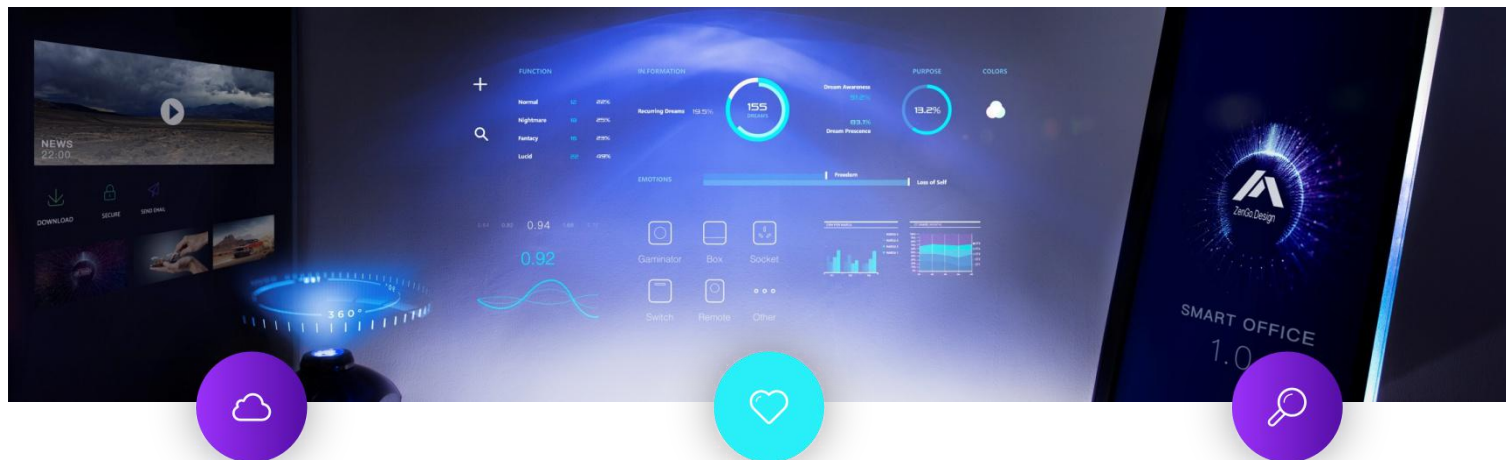

Decentralized game entertainment platform

7.1 brief introduction

Caen entertainment platform is an important part of Caen ecology. It supports multi chain games on the shelves, provides an entertainment output platform for many game development teams, creates a perfect entertainment system of Caen, and adds more fun to users.

7.2 Entertainment platform

One click on the shelf

Game ecology

Fun and entertainment

PART 08

Project planning

Starting from the end, looking forward to the future

8.1 Entertainment platform
